Applicant: John S. HENDRICKS

Serial No: New Application

Art Unit: Unknown

Filed: September 28, 2001

Examiner: Unknown

Title: ELECTRONIC BOOK SELECTION AND DELIVERY SYSTEM HAVING
PURCHASE AND ACCOUNT MANAGEMENT FEATURES (Amended)
This is a divisional application of Serial No. 09/237,825, filed on January 27,
1999.

PRELIMINARY AMENDMENT

Assistant Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

Prior to examination, please amend the above-identified application as follows:

In the Title

Please change the title to read: "ELECTRONIC BOOK SELECTION AND DELIVERY
SYSTEM HAVING PURCHASE AND ACCOUNT MANAGEMENT FEATURES".

In the Specification

On page 1, lines 3-6, please change the paragraph to read as follows:

This application is a division of U.S. Patent Application Serial No. 09/237,825, filed
January 27, 1999, which is a division of Serial No. 08/336,247, filed November 7, 1994, now
U.S. Patent No. 5,986,690, which is a continuation-in-part of U.S. Application Serial No.
08/160,194, filed December 9, 1993, all of which are incorporated herein by reference as if fully
set forth.

In the Claims

Please cancel claims 1-9 and add new claims 10-29 as follows.

10. A method for tracking purchases of electronic books, comprising:
- storing identifications of a plurality of electronic books for display on a viewer;
 - associating each of the electronic books with a source;
 - providing the electronic books for purchase by subscribers;
 - recording an indication of purchases of the electronic books; and
 - associating an amount of each purchase with the source for the corresponding electronic book.
11. The method of claim 10 wherein the associating step includes associating the amount with a publisher for the corresponding electronic book.
12. The method of claim 10 wherein the providing step includes electronically communicating with a viewer for use in receiving requests to purchase the electronic books.
13. The method of claim 10, further including charging a subscriber account for the purchases.
14. The method of claim 10, further including generating a bill to one of the subscribers for the purchases.

15. A method for providing on-line accounts for purchases of electronic books, comprising:

- storing identifications of a plurality of electronic books on a viewer;
- providing the electronic books for purchase by subscribers;
- maintaining on-line accounts for the subscribers;
- recording an indication of purchases of the electronic books in the corresponding accounts; and

permitting each of the subscribers to access a corresponding one of the on-line accounts for the subscriber.

16. The method of claim 15, further including providing on-line access to a customer service representative for the on-line accounts.

17. The method of claim 15 wherein the providing step includes electronically communicating with a viewer for use in receiving requests to purchase the electronic books.

18. The method of claim 15, further including charging one of the accounts for the purchases.

19. The method of claim 15, further including generating a bill to one of the subscribers for the purchases.

20. An apparatus for providing electronic books for purchase, comprising:

a billing and collection system for electronically communicating with a viewer for providing electronic books for purchase, wherein the billing and collection system executes a method comprising:

storing identifications of a plurality of electronic books for display on the viewer;
associating each of the electronic books with a source;
providing the electronic books for purchase by subscribers;
recording an indication of purchases of the electronic books; and
associating an amount of each purchase with the source for the corresponding electronic book.

21. The apparatus of claim 20 wherein the associating step includes associating the amount with a publisher for the corresponding electronic book.

22. The apparatus of claim 20 wherein the providing step includes electronically communicating with a portable viewer for use in receiving requests to purchase the electronic books.

23. The apparatus of claim 20, further including charging a subscriber account for the purchases.

24. The apparatus of claim 20, further including generating a bill to one of the subscribers for the purchases.

25. An apparatus for providing electronic books for purchase, comprising:
a billing and collection system for electronically communicating with a viewer for providing electronic books for purchase, wherein the billing and collection system executes a method comprising:
storing identifications of a plurality of electronic books for display on the viewer;
providing the electronic books for purchase by subscribers;
maintaining on-line accounts for the subscribers;
recording an indication of purchases of the electronic books in the corresponding accounts; and
permitting each of the subscribers to access a corresponding one of the on-line accounts for the subscriber.
26. The apparatus of claim 25, further including providing on-line access to a customer service representative for the on-line accounts.
27. The apparatus of claim 25 wherein the providing step includes electronically communicating with a portable viewer for use in receiving requests to purchase the electronic books.
28. The apparatus of claim 25, further including charging one of the accounts for the purchases.

Divisional of Appln. Serial No. 09/237,825

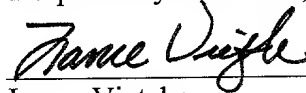

29. The apparatus of claim 25, further including generating a bill to one of the subscribers for the purchases.

REMARKS

Applicant files the present division to claim additional disclosed embodiments. Applicant has amended the title to reflect the inventions now claimed. Claims 10-29 are pending. Consideration and allowance of all pending claims are respectfully requested.

Divisional of Appln. Serial No. 09/237,825

Marked-Up Copy of Specification Amendments

The text on page 1, lines 3-6, is changed as follows:

[This application is divisional of application Serial Number 08/336,247, filed November 7, 1994, which is a continuation-in-part of Application Serial Number 08/160,194, entitled ADVANCED SET-TOP TERMINAL FOR CABLE TELEVISION DELIVERY SYSTEMS, filed December 9, 1993.]

This application is a division of U.S. Patent Application Serial No. 09/237,825, filed January 27, 1999, which is a division of Serial No. 08/336,247, filed November 7, 1994, now U.S. Patent No. 5,986,690, which is a continuation-in-part of U.S. Application Serial No. 08/160,194, filed December 9, 1993, all of which are incorporated herein by reference as if fully set forth.

Clean Copy of Pending Claims

10. A method for tracking purchases of electronic books, comprising:
- storing identifications of a plurality of electronic books for display on a viewer;
 - associating each of the electronic books with a source;
 - providing the electronic books for purchase by subscribers;
 - recording an indication of purchases of the electronic books; and
 - associating an amount of each purchase with the source for the corresponding electronic book.
11. The method of claim 10 wherein the associating step includes associating the amount with a publisher for the corresponding electronic book.
12. The method of claim 10 wherein the providing step includes electronically communicating with a viewer for use in receiving requests to purchase the electronic books.
13. The method of claim 10, further including charging a subscriber account for the purchases.
14. The method of claim 10, further including generating a bill to one of the subscribers for the purchases.
15. A method for providing on-line accounts for purchases of electronic books, comprising:
- storing identifications of a plurality of electronic books on a viewer;

providing the electronic books for purchase by subscribers;
maintaining on-line accounts for the subscribers;
recording an indication of purchases of the electronic books in the corresponding
accounts; and
permitting each of the subscribers to access a corresponding one of the on-line accounts
for the subscriber.

16. The method of claim 15, further including providing on-line access to a customer service
representative for the on-line accounts.

17. The method of claim 15 wherein the providing step includes electronically
communicating with a viewer for use in receiving requests to purchase the electronic books.

18. The method of claim 15, further including charging one of the accounts for the purchases.

19. The method of claim 15, further including generating a bill to one of the subscribers for
the purchases.

20. An apparatus for providing electronic books for purchase, comprising:
a billing and collection system for electronically communicating with a viewer for
providing electronic books for purchase, wherein the billing and collection system executes a
method comprising:

storing identifications of a plurality of electronic books for display on the viewer;
associating each of the electronic books with a source;
providing the electronic books for purchase by subscribers;
recording an indication of purchases of the electronic books; and
associating an amount of each purchase with the source for the corresponding electronic book.

21. The apparatus of claim 20 wherein the associating step includes associating the amount with a publisher for the corresponding electronic book.

22. The apparatus of claim 20 wherein the providing step includes electronically communicating with a portable viewer for use in receiving requests to purchase the electronic books.

23. The apparatus of claim 20, further including charging a subscriber account for the purchases.

24. The apparatus of claim 20, further including generating a bill to one of the subscribers for the purchases.

25. An apparatus for providing electronic books for purchase, comprising:

a billing and collection system for electronically communicating with a viewer for providing electronic books for purchase, wherein the billing and collection system executes a method comprising:

storing identifications of a plurality of electronic books for display on the viewer;

providing the electronic books for purchase by subscribers;

maintaining on-line accounts for the subscribers;

recording an indication of purchases of the electronic books in the corresponding accounts; and

permitting each of the subscribers to access a corresponding one of the on-line accounts for the subscriber.

26. The apparatus of claim 25, further including providing on-line access to a customer service representative for the on-line accounts.

27. The apparatus of claim 25 wherein the providing step includes electronically communicating with a portable viewer for use in receiving requests to purchase the electronic books.

28. The apparatus of claim 25, further including charging one of the accounts for the purchases.
